Mr. Steven Gunderson
Colorado Department of Public Health and Environment
4300 Cherry Creek Drive South
Denver, Colorado 80246-1530

Dear Mr. Gunderson:

Enclosed please find a copy of the "Status Report for Monitoring of Natural Attenuation at IHSS 118.1" for information to your agency. This preliminary report summarizes the sample results for the suite of analytes that were sampled in the first sampling round and determine whether the suite should be modified given the results obtained. The overall goal of the project is to characterize the potential for natural attenuation to be a significant factor in the remediation strategy for Individual Hazardous Substance Site 118.1 Dense Non-Aqueous Phase Liquid source.

If you should have any technical questions related to this status report, please contact Norma I. Castaneda at (303) 966-4226 or contact me at (303) 966- 5918.

Sincerely,

Handwritten signature of Joseph A. Legare in cursive script.

Joseph A. Legare
Assistant Manager
for Environment and Infrastructure
